## SUMMARY

Strategic IT leader with 10+ years of experience bridging business strategy and technology execution. Proven track record advising executive leadership on digital transformation, leading enterprise IT programs, reducing SaaS and cloud spend, and driving IT innovation across ERP, HRIS, IAM, and eCommerce platforms. Fluent in both technical implementation and business alignment, with strong stakeholder engagement and governance capabilities.

---

## EXPERIENCE

### Enterprise Architecture Team Lead | Vayyar Imaging LTD | Yehud, Israel | February 2019 - December 2024

- Advised CEO and senior leadership on digital transformation strategy; drove initiatives that supported company growth from 120 to over 300 employees through scalable IT and automation.
- Part of the IT R&D division, managed eCommerce/Web operations and enterprise-level IT projects (dual role).
- Led cross-department SaaS consolidation, presenting to CEO and VPs, achieving 30% cost savings by migrating GSuite, Dropbox, and Zoom to Microsoft 365.
- Served as interface lead for ERP (NetSuite) and HRIS (BambooHR) projects, aligning systems with business processes and ensuring seamless IAM integration and compliance (including GDPR/CCPA).
- Championed migration from Magento to Shopify, increasing eCommerce revenue from \$1.5M to \$4.5M annually; conducted PoCs, stakeholder engagement, and team leadership.
- Built centralized onboarding/offboarding data warehouse with Funnel.io, driving actionable KPIs for Logistics and streamlining provisioning automation.
- Led multi-cloud cost optimization initiative across AWS, Azure, GCP, and AliCloud, reducing idle service costs and streamlining cross-team usage.
- Championed adoption of Microsoft Teams and the full M365 suite, leading training, engagement, and cross-departmental enablement.
- Acted as GDPR/CCPA compliance lead for eCommerce platforms; managed consent tools and ensured advertiser/data pipeline compliance with EU/US regulations.
- Piloted and evaluated advanced IT solutions including CNAPP, ZTNA, and data security platforms to support evolving security posture and operational resilience.

### Data and Identity Management Consultant | MIPRO Consulting | Tel Aviv Area, Israel (Remote) |

#### February 2018 - December 2018

- Working remotely for Adventist Health Systems acting as staff augment in multiple Identity Management projects.
- Responsibilities include reporting platform upgrade (SSRS 2016), ETL changes, perform application/database system migration to a new platform (Windows 2016/SQL 2016) as well as backend design and oversight for custom C# WEB API for Identity Management provisioning/auditing.

## **Identity Management Architect | Adventist Health System | Altamonte Springs, FL | March 2013 – February 2018**

- Led a team of 7, overseeing task management, weekly meetings, budget planning, change control, job descriptions, consulting services, and project management.
- Developed reports and graphs and automated their distribution, covering application licensing, cross-application dormancy, credentials and certifications, access audits, HIPAA compliance, terminations, and access governance.
- Designed an identity and access reporting data warehouse (SQL Server) aggregating information from multiple platforms, accessible through a custom reporting platform (SSRS).
- Engineered multiple application integrations and ETL solutions using C#/VB.net/Java/JavaScript/Python.
- Successfully executed an enterprise identity overhaul, including the implementation of access provisioning for the largest enterprise application (Cerner EMR) across 80% of the enterprise in 18 months.
- Increased provisioning efficiency and decreased exception turnaround time by 100% (to 2-4 hours) by automating 95% of account build scenarios for clinical and non-clinical staff.
- Decreased audit report turnaround time by 6 hours (for a 100-person sample) by using pre-aggregated data and custom logic to determine actions and instructions for multiple functional team.
- Presented to senior hospital leadership and CIO group on security governance, hospital acquisitions, and digital identity readiness during mergers.

## **Senior Information Security Analyst/Team Lead | Adventist Health System | Lake Mary, FL |**

**January 2012 – March 2013**

## **Intermediate Information Security Analyst | Adventist Health System | Lake Mary, FL | August 2010 – January 2012**

---

## **EDUCATION**

**MS, Management Information Systems | UCF College of Business | Orlando, FL | 2009**

**BS, Information Technology | University of Central Florida | Minor in Management of Information Systems | 2008**

---

## **CERTIFICATIONS**

**Certified Information Security Auditor | ISACA**

**CompTIA Security+ Certification | CompTIA | 2018**

---
